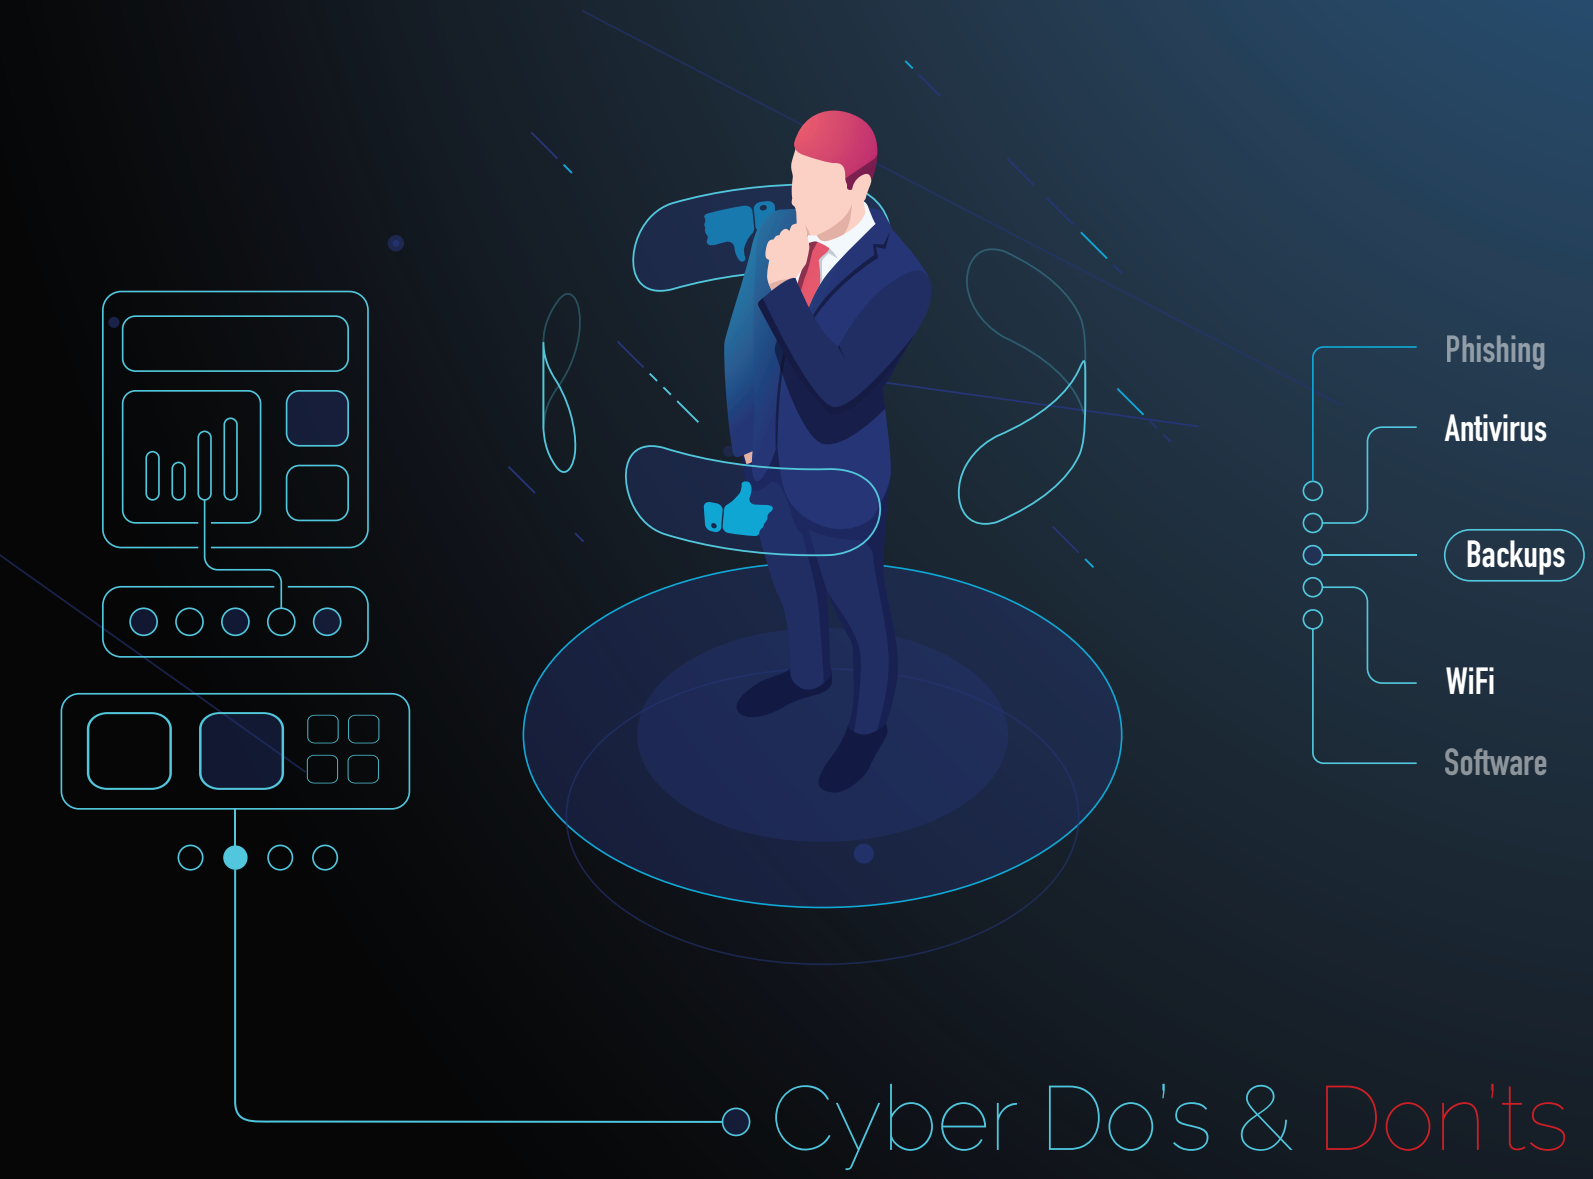
DATA ASSURED



Cyber Do's & Don'ts

In Partnership With:

AMERICA'S SBDC DELAWARE | Small Business Development Center

Presented By:

AMERICA'S SBDC NEVADA

DO'S:

- Use unique complex passphrases and change them regularly
- Turn on encryption on all devices
- Regularly backup all your data with version controlled backups
- Use antivirus/antimalware on all devices
- Keep all software and OS's up to date
- Pay attention to possible signs of phishing
- Educate all employees
- Create a data breach response plan
- Use multi-factor authentication when possible
- Get a cybersecurity insurance policy

DON'TS:

- Open attachments or click links from unknown sources
- Use free public WiFi without a VPN
- Share passphrases or use the same phrase for multiple accounts
- Scan random QR codes or accept random Airdrops
- Install apps or software from unknown sources
- Recycle old devices without properly wiping all data
- Log into any personal accounts on public computers
- Leave unused services running on your devices. *Ex. Bluetooth*
- Plug in random portable devices
- Visit insecure websites (Sites without the "S" in HTTPS)
